

Make your shipments  
more efficient!

« More efficient **logistics** means taking action on: **reducing cost price, reducing timescales** and reducing **environmental impacts**. »\*

Are you looking for streamline all your transport services and control their costs?

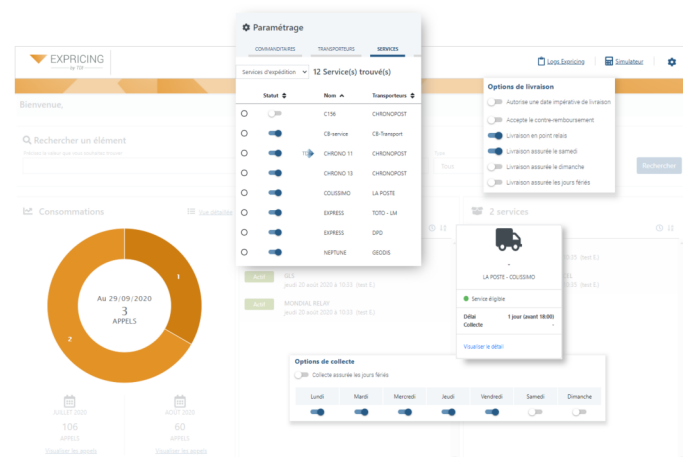

To meet your needs, we have developed: **Expricing**

This module is a tool for supporting decision-making that lets you:

- Manage your pricing (shipping, options, extra cost, and resale)
- Manage delivery times
- Manage constraints relating to carriers or areas served
- Run pricing simulations

With **Expricing**, no more surprises: take control of your costs and delivery times!

You have the option of generating multiple pricing and scheduling and automatic change.

## How does it work?

**Expricing** is a powerful decision making tool.

With an accurate and complete configuration of all transport-related information, you can be sure to choose the most efficient carrier for each shipments.

1. Log in to the web portal: <https://mytdi.fr/>
2. Click on « **Expricing** » tab
